

The Algae Store

About us:

The Algae Store is India's first B2B platform for macro algae (seaweed), connecting suppliers and buyers across the entire value chain located in various countries.

We provide market access for seaweed cultivators and seaweed-product manufacturers, as well as simplify procurement for industries.

We provide applications for sectors such as food, pharma, cosmetics, material science and agriculture, thus improving transparency in the supply chain.

Services

Seaweed marketplace

Connecting industrial buyers from the seaweed supply chain with seaweed cultivators, suppliers & manufacturers serving one-stop marketplace for stakeholders across the value chain.

Industries gain access to a pool of verified seaweed suppliers which otherwise was an unorganised sector. In turn, seaweed suppliers gain access to business opportunities with small to large-scale buyers.

Procurement services

Manage end-to-end procurement operations, ensuring seamless supply for your business.

We Offer :-

Supplier Identification & Partnerships: Conduct primary and secondary research to identify suppliers that meet your quality and quantity requirements and source raw materials from a network of suppliers from India, Southeast Asia (e.g., Vietnam, Indonesia, and the Philippines), and Europe.

Material specification compliance: Collaboration with your team to ensure that the sourcing of materials aligns with your functional and compositional requirements.

Testing and certification

Ensuring product quality and regulatory compliance is at the heart of our service:

We Offer :-

Testing Support: Assist you in identifying relevant testing and certification bodies, managing the certification process from start to finish. This includes the testing of raw materials and finished products in accredited laboratories.
